

Sala Costa dei Delfini

Padiglione Cetacei

Il Padiglione, progettato da Renzo Piano, è grande come un palazzo di sette piani, ma dall'impatto visivo leggero grazie alla parte vetrata.

Quattro vasche a cielo aperto che possono ospitare fino a 10 esemplari di delfino tursiope. Il percorso si snoda su **due livelli espositivi**, consentendo ai visitatori/ospiti di ammirare gli esemplari sia dall'alto (permettendo di **ascoltare i suoni emessi dai delfini**, oltre che di osservarli anche durante l'addestramento) sia da una **prospettiva subacquea**.

Dolphin Cove Hall

Cetaceans Pavilion

The Pavilion, designed by Renzo Piano, is as big as a seven-storey building, but slight visual impact thanks to the glass part.

Four open tanks that can accommodate up to 10 bottlenose dolphin specimens.

The route runs on **two exhibition levels**, allowing visitors / guests to admire the specimens both from above (allowing you to **listen to the sounds made by dolphins**, as well as to also observe them during training) and from an **underwater perspective**.
